-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. Claims 1-20 are currently pending in the application.

#### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Regarding claims 1-20, according to Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility, to satisfy section 101 requirements, the claims must be for a practical application of the 101 judicial exception, which can be identified in various ways:

- The claims invention "transforms" an article or physical object to a different state or thing.

- The claimed invention otherwise produces a useful, concrete and tangible result.

In the instant application, a method for detecting delays and gains of different propagation paths of a received signal as a whole has no physical structure, does not itself perform any useful concrete and tangible result and thus are non-statutory.

Art Unit: 2616

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lucas (US 5,448,600) discloses method for selecting propagation paths retained for receiving messages transmitted by CDMA radio-communication.

Sourour (US 6,865,218 B1) discloses multi-path interference reduction for a CDMA system.

Bottomley et al (US 2004/02113363 A1) discloses methods and receivers that estimate multi-path delays by removing signal rays from a power-delay profile.

### Conclusion
